

ProBio TD ERBIO TD (LIQUID TOILET DIGESTER & CLEANER)

Toilet systems, drain and pipes, sanitary system

Description

ProBio TD is a concentrated liquid living aerobic and anaerobic bacteria selected to produce active enzymes which are required for the degradation of sanitation wastes. If ProBio TD used regularly will supplement the bacteria normally present in the system and thereby degrade waste material more rapidly and efficiently.

Directions For Use/Applications & Dosage Rates General Cleaning

The best place to apply ProBio TD is through sinks, showers, commodes and scuppers. With such an application all system will be treated. It is advised to dosing to the sewage tank line directly. The first dosage will be applied to the waste holding tank directly. Dosage will be 3 – 3,5 litres for 1000 liter. ProBio TD will be active in 24-48 hours after this first dosage. Following daily usage is 0,8 – 1 litre for 1000 litres.

If ProBio TD is going to be used as a cleanser for toilets, drains and sinks, 0,1 litre for each area will be enough for 1-2 times a week.

Biological Disinfectant Cleaners

Summary

- Cleans the sanitary systems without manual labor
- Reduces maintenance cost with avoiding sudden pipe repairs.
- Dissolves sanitation wastes grease, and fat accumulation in toilet systems.
- Environmentally safe and completely biodegradable
- Helps to reduce the unwanted odor in closed places with foul smell.
- Prevents clogging.
- Safe to use, it does not contain caustic, corrosive, or toxic substances.

A) Organic Properties

Appearance

Physical State (20°C): Liquid

Color : Colorless

Odor : Odorless

B) Physical Properties

pH : 8,5 – 9,5

Molecular Weight : -

Flash Point : -

Density : 0.90-1.00 gr/ cm³

Solubility in Water : Completely

Storage Conditions

Store at moderate temperatures (10 – 45°C), Keep in cool dry place, Keep container closed when not in use.

Packing : 25-30 L. sealed plastic drums.

Storage Period : 1 year.

Approvals & Certificates

Product No : SP-KS-083
