

ProClean OA^{ER-OA} (OIL ABSORBENT POWDER)

Cleaning of spilled oil and fuel oil on the floors and decks.

Description

ProClean OA is a very strong liquid absorbent made from completely natural minerals. It is a non-toxic nature-friendly product. It does not react chemically with the applied liquid, but if present, it eliminates its flammable properties. ProClean OA can be applied on any surface where there are oil, fuel and similar spills. Since it is in powder form, it is generally used in spills on land or on deck. In general, the most difficult surfaces to clean are porous and absorbent surfaces, such as concrete. ProClean OA, being a powder, effectively cleans even porous surfaces. Fine dust grains enter these small pores and draw the liquid therein; they are easy to clean.

Directions For Use/Applications & Dosage Rates General Cleaning

Cover the liquid surface to be applied well with ProClean OA so that the liquid does not overflow, wait for the liquid to be absorbed for 10-20 minutes and sweep the product. If the liquid you want to clean is flammable, the liquid loses its flammable properties after ProClean OA is applied. Its absorption capacity is 100±10%.

Oil Spill Cleaners

Summary

- ProClean OA is non-toxic.
- It completely breaks down in nature.
- It is easy to apply and clean.
- Eliminates the flammability of the liquid to which it is applied.
- Absorption capacity is 100% ±10%.

A) Organic Properties

Physical State (20°C): Powder

Color : White

Odor : Odorless

B) Physical Properties

pH (concentrated) : -

Molecular Weight : -

Explosion Limit : No

Flash Point : -

Density : 0.75-0.85 g/cm³

Storage Conditions

Packaging Type : 15 kg sealed, plastic buckets

Storage Period : 3 years

Approvals & Certificates

Product No : SP-KS-031
