

ProClean APC ER-APC (ALL PURPOSE CLEANER)

Multi-purpose surface cleaner

Description

ProClean APC is an eco-friendly, water-based, multi-purpose cargo tank cleaner. It is formulated as a potent oil remover. It can be used for cleaning diesel engine oil and mineral oils from various surfaces. It is low-toxic, biodegradable, and can be used safely by operational personnel. In addition to being a tank washing chemical, it also serves as an oil cleaner for cleaning engine rooms, decks, cabins, compartments, various tools, and floors. It can additionally be used for cleaning fabrics, cloths, and sofas. It is a well-foaming product; it can also be used with foam additives if necessary.

Directions For Use/Applications & Dosage Rates General Cleaning

General Cleaning: Prepare a 2-3% ProClean APC solution with water. Apply to the dirty surface with a sponge, brush or sprayer. Leave on the surface for 5-10 minutes, then rinse with water. You can heat the solution to get better results. Use the product as a concentrate for heavily soiled surfaces. After applying product, leave it on the surface for 5-10 minutes, brush a little and finally rinse with plenty of water.

Spraying Method

The aqueous solution of 10-15% ProClean APC is sprayed on the surface and left for 5-10 minutes. To get better results, it is recommended to heat the solution. It is non-corrosive, so it can be safely used on all kinds of surfaces.

Circulation Method

Circulate the 0.1-1.0% ProClean APC aqueous solution, or spray with a water jet. The same solution can be used repeatedly until it loses its effectiveness.

Regional Cleaning

Depending on the level of contamination, ProClean APC can be used either as a concentrate or as a solution mixed with a maximum of 20% water. Spray it onto the surface and allow it to sit for 20 to 30 minutes before rinsing thoroughly with plenty of water. The cleaning effectiveness improves with hotter water, up to a maximum temperature of 60°C.

Tank & Cargo Hold Cleaners

Summary

- It is a water-based cleaner with low toxicity.
- Non-flammable, non-corrosive and provides a healthy cleaning.
- ProClean APC is biodegradable; separates into its components without harming nature after use
- It is used in a variety of marine cleaning and degreasing processes.

A) Organic Properties

Physical State (20°C): Liquid
Color : Yellow
Odor : Soft

B) Physical Properties

pH : 12.0-13.0
Molecular Weight : -
Explosion Limit : -
Flash Point : -
Density : 1.05-1.15 g/cm³
Solubility : Completely soluble in water

Storage Conditions

Packaging Type : 25-30-200 liters sealed, original plastic drums
Storage Period : 3 years

Approvals & Certificates

Product No : SP-KS-039
