

ProClean Orange ER-APC ORANGE

Multi-purpose surface and tank cleaner

Description

ProClean Orange is an ecological, multi-purpose, water-based cargo tank cleaner. It is a premium quality cleaner and degreaser designed to effectively remove oil and dirt from any surface. This all-purpose cleaner is low in toxicity, biodegradable, and safe for use by personnel.

Directions For Use/Applications & Dosage Rates General Cleaning

Direct Injection Method: Use a 10-15% cleaning solution in fresh water, leave the solution on the surface for 5-10 minutes before wiping it off. Heating the solution will provide better results. Since it is non-corrosive, it can be used on any surface.

Circulation Method : Use 0.1-1.0% cleaning solution in fresh water and circulate or spray with water jets. The solution can be reused until it is no longer effective.

Stain Cleaning : Depending on the pollution, ProClean Orange should be sprayed undiluted or diluted with 20% water and the dirt in the area should be allowed to soak for 20-30 minutes, then washed with plenty of water. The efficiency of cleaning can be increased by using warm water up to 60°C for both cleaning and rinsing tank coating surfaces.

Tank & Cargo Hold Cleaners

Summary

- It is a water-based cleaner.
- It has low toxic properties.
- It is not flammable.
- It offers a fragrant and healthy environment.
- Thanks to its biodegradable feature, it is separated into its components without harming nature after use
- With its versatile use, it is used in many cleaning and degreasing processes

A) Organic Properties

Physical State (20°C): Liquid
Color : Yellow
Odor : Orange scented

B) Physical Properties

pH : 12.0-13.0
Molecular Weight :-
Flash Point :-
Density : 1.05-1.15 g/cm³
Solubility : Completely soluble in water.

Storage Conditions

Storage : Ambient
Temperature
Packaging Type : 25-30-200 liters original plastic drums
Storage Period : 3 years

Approvals & Certificates

Product No : SP-KS-064
