

ProClean Osmo-A^{ERBRANE-ACF}

Acid-based cleaner in reverse osmosis systems

Description

ProClean Osmo-A is a membrane cleaning chemical that cleans the formation of inorganic debris and deposits on membrane surfaces in reverse osmosis systems. It dissolves crystallisation, deposits and iron pollution on membrane surfaces, opening the pores of the membrane and prolonging its life. It is also effective on dissolved and undissolved iron.

Directions For Use/Applications & Dosage Rates General Cleaning

The product is diluted by 1/4 and given to the system for 3-6 hours and circulated. Then, draining the system and rinsing it with clean freshwater 1-2 times for 1 hour will make the life of the membrane longer.

Reverse Osmosis Antiscalant

A) Organic Properties

Physical State (20°C): Liquid
Color : Yellow
Odor : Pungent (sharp) smell

B) Physical Properties

pH : 0-2.0 (%1)
Explosion Limit : No
Flash Point : No
Density : 1.05-1.15 g/cm³
Solubility : Completely soluble in water.

Storage Conditions

Storage : Store in the original packaging in a cool and well-ventilated place.
Packaging Type : 25 kg sealed, original plastic drums
Storage Period : 2 years

Packaging must be tightly sealed. Do not use products with defaced packaging and labels. Aluminum equipment should not be used for storage and transfer.

Approvals & Certificates

Product No : SP-KS-185
