

## ProClean Plug ERCLEAN LOGAR

Unclogging manholes and drains that are blocked with vegetable and animal oils.

### Description

ProClean Plug is used to open manholes blocked by vegetable and animal fats.

### Directions For Use/Applications & Dosage Rates General Cleaning

- Pour the product into the sink or pipeline leading to the clogged manhole and pour boiling water over it. Apply continuously, little by little, until the manhole is opened.
- To unclog a blocked drain, add 10-15% of the product to hot water (heated to 70-80°C). Pour the solution slowly and continuously down the drain until the blockage is cleared.
- To prevent future clogs in your drains, it is advisable to use the product 1-2 times a month. For this maintenance, add approximately 2% of the product to water heated to 70-80°C and drain it slowly through the water line.

Avoid swallowing, inhaling vapor, and contact with skin or eyes. In such cases, refer to the SDS and consult a doctor.

Disinfectant Cleaning Chemical

### Summary

- The product is not effective in dissolving substances such as limescale, toilet paper, cloth, or plastic in manholes.
- It is primarily designed for use in kitchen drains.
- It is very useful to apply the product once a month to prevent the manhole from clogging again

### A) Organic Properties

Physical State (20°C) : Liquid  
Color : Colorless  
Odor : Soft

### B) Physical Properties

pH (concentrated) : 12.0-13.0(%1)  
Explosion Limit : No  
Flash Point : No

### Storage Conditions

Packaging Type : 25 liters sealed,  
original plastic drums  
Storage Period : 3 years

### Approvals & Certificates

Product No : SP-KS-537
