

ProClean Teepol ER-TEEPOL

Dirty surfaces with petroleum and oil residues

Description

ProClean Teepol is a water-based liquid detergent derivative cleaning product. It is formulated to remove animal fats, oil, grease and impurities. ProClean Teepol is an environmentally friendly product and is non-toxic. It is completely biodegradable in the environment and is a safe product to use.

Directions For Use/Applications & Dosage Rates General Cleaning

ProClean Teepol is a powerful, water-based oil remover designed for use in engine rooms, on decks, in cabins, and in various compartments. Depending on the level of contamination, it can be prepared in different concentrations for various cleaning tasks. This solution is effective for safely removing dirt, oil, and grease. ProClean Teepol can be used with a brush, cloth, spray gun, or through tank cleaning systems.

For minor cleaning tasks, dilute the solution to 4-6%, apply it to the surface and allow it to sit for 5-15 minutes before wiping it off. Using hot water for dilution enhances its effectiveness.

When utilised for tank cleaning, ProClean Teepol can be circulated in a 0.1-1% solution or sprayed with a water jet, especially for tanks containing fuel oil (heavy fuel), diesel oil (light fuel), gasoline, and oils. It is also suitable for cleaning mineral oils and cooking oils, as well as for decarbonization processes.

ProClean Teepol works effectively on all types of oil, dirt, and soot, including fuel oil. It's particularly advantageous for indoor use, as it does not produce any unpleasant odours and helps eliminate foul smell in the environment.

For cleaning heavy dirt and oily surfaces, dilute ProClean Teepol at a maximum ratio of 1:3. Allow the solution to sit on the surface for 5-10 minutes, then scrub with a brush before rinsing with water.

Tank & Cargo Hold Cleaners

Summary

- It is a multi purpose water-based cleaner with a wide range of applications.
- It is a biodegradable, environmentally friendly product.
- Does not contain nonyl phenol ethoxylates or other estrogenic compounds.
- ProClean Teepol is not flammable.
- It does not leave any residue on the cleaned surface.
- Leaves a pleasant and fresh smell in the cleaned area.
- ProClean Teepol is economical and easy to use.

A) Organic Properties

Physical State (20°C):	Liquid
Color	: Yellow
Odor	: Soft scented

B) Physical Properties

pH	: 11.0-12.0
Molecular Weight	: -
Explosion Limit	: No
Flash Point	: -
Density	: 1.03-1.08 g/cm ³
Solubility	: Completely soluble in water.

Storage Conditions

Packaging Type	: 25-30-200 liters sealed, original plastic packaging
Storage Period	: 3 years

Approvals & Certificates

Product No : SP-KS-043
