

ProPure Freeze ANTIFREEZE

Frost protector

Description

ProPure Freeze protects the system from freezing where it is used. The product is additive-free and concentrated. It is used in cooling systems that are likely to freeze by mixing with water in all proportions. At the same time, it is reinforced with anti-corrosion and protects the system from corrosion and rust.

25	-13
30	-17
35	-22
40	-25
45	-32

Cooling Water Treatment

Summary

- It protects the system against freezing in the area where it is used.
- Thanks to its special anti-corrosion additives, it prevents the formation of corrosion in the system used.

A) Organic Properties

Appearance : Clear
 Physical State (20°C): Liquid
 Color : Transparent green
 Odor : Slight smell of alcohol

B) Physical Properties

Water (% by weight) : 0.051
 Acidity (% by weight): 0,0009
 Relative Density : 1.1154
 Iron (ppm) : 0.1
 Degree of Purity (%) : 99.98

Storage Conditions

Packaging Type : 25-30-60-200 liters original plastic drums
 Storage Period : 3 years
