

ProTank Reefer

REEFER CLEAN (REFRIGERATED ROOMS CLEANER)

Cold storages, deep freezers

Description

ProTank Reefer is a water-based product formulated as a strong oil, dirt, stain and dirt remover and also has disinfectant properties. Thanks to its disinfectant feature, it purifies surfaces from bacteria and germs. When there are no bacteria and germs on the surface, foul smell is also prevented. It does not contain heavy metals, phenol derivatives or chlorine. ProTank Reefer provides both cleanliness and hygienic protection on provision stores on board, freezers, dining areas, cargo holds and all other surfaces (carpet, ceramic, wood, kitchen).

Directions For Use/Applications & Dosage Rates General Cleaning

For general purpose cleaning, dilute ProTank Reefer at a rate of 1-5% and apply it to the surface with a spray or brush, wait a few minutes and rinse the surface with water. When cleaning large areas, dilute the product by 1-10% and apply it to the dirty surface with the help of a low-pressure spray. If the pollution is too much, dilute the product by 1-10% and apply it and brush for 4-5 minutes. Then rinse with a high-pressure water jet.

Tank & Cargo Hold Cleaners
