

DESCRIPTION

ANTIFREEZE is a product which protects the system against freezing. The product is in pure, concentrated form. It is used in cooling systems which has the risk of freezing. It can also be mixed with water in every percentage. Furthermore it is supplemented with anti-corrosives so it protects the system from corrosion and rust.

Chemical Name : Water conditioning (Chemical Mixture)
Document No : SP-KS-017
Trade Name : **ANTIFREEZE**
Usage : Protective against freezing.

A. ORGANIC PROPERTIES

Appearance

Physical State (20°C) : Liquid

Color : Transparent green liquid

Odor : Slightly alcoholic odor.

B. PHYSICAL PROPERTIES

Water, % by weight : 0.051

Acidity, % by weight : 0.0009

Specific density : 1.1154

Appearance : Clear

Iron, ppm : 0.1

Degree of purity : 99.98

APPLICATION, FEATURES & BENEFITS

- ✓ Protects systems against freezing.
- ✓ Thanks to the anti-corrosive additives in its content, it prevents formation of corrosion in the system it is used.

STORAGE INFORMATION

Packaging: Packed in original plastic jerry cans of 25-30-60-200 L. Storage period is 3 years.

DIRECTIONS FOR USE/APPLICATIONS & DOSAGE RATES
