

DESCRIPTION

“**FOAM MAKER**” is a concentrated water based product, which can be used as an additive in all alkaline water based cleaning chemicals. It is totally water soluble, non-flammable and biodegradable solution. It is very effective and easy to use. The extra foam added by the foam maker, improves the surface adhesion of the cleaning chemical on vertical surfaces.

Product Name	: <u>FOAM MAKER</u>
Document No	: SP-KS-229
Chemical Name	: Chemical Mixture
Usage Area	: Foam Additive

A. ORGANIC PROPERTIES

Appearance

Physical Status (20°C)	: Semi Viscous
Color	: Yellow
Odor	: Odorless

B. PHYSICAL PROPERTIES

pH (%1 solution)	: 7.5 – 8.5
Molecular Weight	:
Flash Point	: -
Density(20 °C)	: 1.08-1.18 gr/cm ³
Solubility in Water	: Completely

APPLICATION, FEATURES & BENEFITS

- ✓ Compatible to use with all alkaline water based cleaning chemicals
- ✓ Non-flammable
- ✓ Biodegradable
- ✓ Improves surface adhesion of water based alkali cleaners.

STORAGE INFORMATION

Store at moderate temperatures. Packing: 5-30 sealed plastic drums. Storage Period: 3 years.

DIRECTIONS FOR USE / APPLICATIONS & DOSAGE RATE

0.5-1 % of FOAM MAKER is ideal dosage for all water based Cleaning Solution. 5 L Foam Maker is adequate per 200 L of washing solution.
